CAREER OBJECTIVE

Fourth-year Bachelor of Science in Information Technology student seeking an OJT opportunity to apply and strengthen my knowledge of information technology. Interested in gaining hands-on experience in networking, cybersecurity, IT support, computer hardware, and information systems while contributing to a team and learning from experienced professionals.

EDUCATION

Bachelor of Science in Information Technology (BSIT)
College of Our Lady of Mercy of Pulilan Foundation, Inc.
Fourth Year, First Semester — Currently Enrolled

TECHNICAL SKILLS

- Cybersecurity: Fundamental cybersecurity concepts.
- Networking: Fundamental networking concepts, IP addressing, network configuration, and basic troubleshooting.
- Web Development: HTML, CSS, JavaScript, Bootstrap 5, PHP, and MySQL.
- Programming: C# (Windows Forms) using Visual Studio 2022, SQL Server and Kotlin with Android Studio and Firebase.
- Productivity Tools: Microsoft Word, Excel, and PowerPoint.

Areas of Interest: networking, cybersecurity, technical troubleshooting, IT support, web development and computer hardware

ACADEMIC PROJECTS

IneSight: Web-Based Community Health Monitoring and Decision Support System with Purok-Level Heatmap Visualization for Barangay Santa Ines, Plaridel, Bulacan
Capstone Project

- A web-based system that helps barangay health personnel monitor community health information and support decision-making through a purok-level map shaded using GeoJSON purok boundaries.
- Built with PHP, MySQL (PDO), Bootstrap 5, JavaScript, jQuery, Leaflet.js, Chart.js, DataTables, and mPDF. Collaborating with team members on its design and development.
- Live demo: bhms-santaines.kesug.com

Barangay Management Information System, Barangay Lumbac, Pulilan, Bulacan
Final Project, Event-Driven Programming and Database

- A desktop system that manages residents' records, certificates, blotter entries, and barangay officials.
- Built with C#, Windows Forms, and SQL Server.
- GitHub: github.com/zedahh/bmis

Personal Portfolio Website
Final Project

- A responsive, dark-themed portfolio built with HTML, CSS, and JavaScript and deployed on Vercel: johnzedric-portfolio.vercel.app
